

Corrigenda

Bernard D. Katz, "On a Sophisma of Richard Kilvington and a Problem of Analysis," *Medieval Philosophy and Theology* 5(1996): 31–38.

In footnote 12, page 36, the formula should read as follows:

$$\exists x \exists x' (\forall y [\text{White (Socrates, now, } y) \leftrightarrow y = x] \ \& \ \forall y [\text{White (Plato, now, } y) \leftrightarrow y = x'] \ \& \ x > x').$$

In footnote 14, page 37, the formula should read as follows:

$$\exists x \exists x' (\forall y [\text{White (Socrates, now, } y) \leftrightarrow y = x] \ \& \ \sim \exists y \text{White (Plato, now, } y) \ \& \ \forall y [\text{White (Plato, immediately after now, } y) \leftrightarrow y = x'] \ \& \ x > x').$$

The publisher regrets this error.
